## **DETAILED ACTION**

### ***Response to Arguments***

Applicant's arguments, see page 7, lines 6-8, filed 20 December 2003, with respect to claims 1-5, 16 and 17 have been fully considered and are persuasive. The Final Rejection of claims 1-5, 16 and 17 has been withdrawn, and a detailed examination follows.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

**Claim 16** is rejected under 35 U.S.C. 102(b) as being anticipated by Li '672.

Li discloses a chemical mechanical polishing apparatus, comprising: a polishing surface; a carrier head to hold a substrate having a conductive layer disposed thereon in contact with the polishing surface; a motor to create relative motion between the substrate and the polishing surface; an eddy current monitoring system including an inductor and a current source to drive the inductor to generate an alternating magnetic field that induces eddy currents in the conductive layer; a sensor to measure a strength of the magnetic field and a phase difference between the magnetic field and the drive signal; and a computer configured to calculate the correction factor based on the strength of the magnetic field and calculate a thickness of the conductive layer from the phase difference and the correction factor (Fig. 4; and column 4, line 18 –column 6, line 41).

***Allowable Subject Matter***

Claims 1-5 and 17 are allowed.
